

No ASCII Compares to the E-Transcript™ Format.

Standardized, secure and superior transcripts for litigators and courts.

RealLegal® E-Transcript™, the format that surpasses any ASCII or paper transcript, is now available from your court reporter. Using the innovative RealLegal E-Transcript Manager software, court reporters convert their static, cumbersome ASCII transcripts into high performance E-Transcript files for their clients. The end product is completely accurate and is flexible to the routines of today's legal professional.

The E-Transcript™ Difference

No special software is needed >> Your E-Transcript will arrive via e-mail as a .PTX or via disk as an .EXE. Download the free E-Transcript Viewer from www.reallegal.com once to open, view and print every E-Transcript file you receive, now or in the future. The .EXE version has the E-Transcript Viewer embedded in the transcript.

Easy litigation software import >> E-Transcript files are seamlessly imported into RealLegal Binder™ for complete transcript and exhibit management. Alternatively, your court reporter can set permissions enabling the transcript to be used in other litigation software programs.

Guaranteed page and line integrity >> Every E-Transcript file you receive is professional and perfectly formatted.

Printing power >> Print full or condensed transcripts (up to 16 pages/sheet) and word indices.

Security >> Every E-Transcript file offers virus-protection, encryption, and password protection.

Digitally certified >> At your request, you can receive an E-Transcript file that has been electronically signed with a

valid, verifiable E-Transcript Signature™. E-Transcript Signatures follow statutory guidelines for admissibility and ensure authenticity.

Quick review and search >> Reduce the time spent digesting and summarizing transcripts with the automatically generated Hyperlinked Word Index. The interactive key word index is linked to page and line numbers in the transcript, enabling you to jump directly to each occurrence of a word.

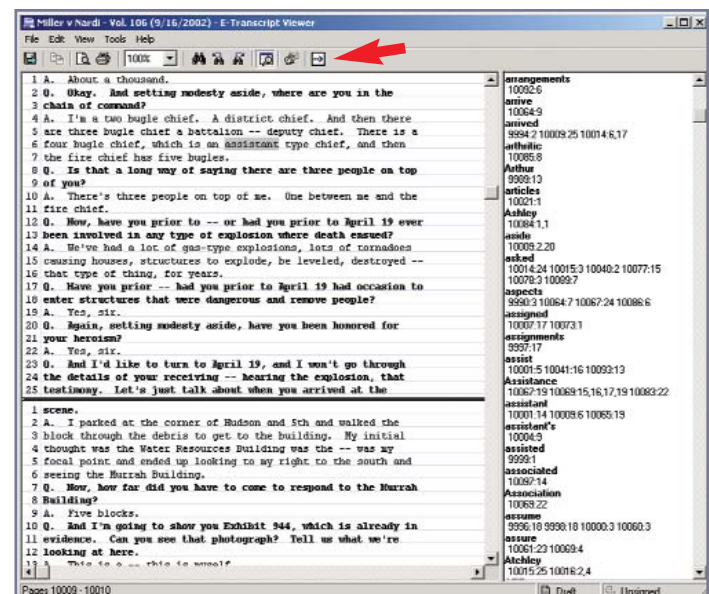

Easy and accurate citations >> Copy text directly from the E-Transcript file and paste it into your work product. The pasted citation includes deponent name, date, page and line summary, and the formatted text.

Immediate delivery >> E-Transcript files can be delivered instantly via e-mail, via diskette, or via a Publisher Bundle™.

360° Discovery Management >> E-Transcript is the flagship RealLegal technology and the foundation for a comprehensive system of litigation tools, including RealLegal Publisher™, RealLegal Binder and RealLegal iBinder™.

Receive E-Transcript™ Files and Digital Exhibits on CD.

A RealLegal Publisher Bundle™ delivers all discovery in one cohesive package.

Tech savvy court reporters offer much more than just the official record. Your court reporter can now deliver digital exhibits along with corresponding E-Transcript™ files — all stored within a powerful viewing environment and delivered on a compact disk. The end product is a Publisher Bundle™.

Using RealLegal® Publisher™ to create ‘bundles’ of transcripts and exhibits, your court reporter can put more power at your fingertips and improve the in-context review of your case materials. Bottom line: You no longer have to juggle the paper-based exhibits while reviewing your electronic transcripts.

Exhibit Viewing Simplicity

Embedded viewers >> Upon inserting the Publisher Bundle™ compact disk into your CD-ROM drive, the user-friendly viewer will automatically open and list the contents of the bundle. You'll require no additional software to thoroughly review all of the transcripts and exhibits.

Review transcripts and exhibits >> Simply click on a transcript (left window) or an exhibit (right window) to open, review or print the file from the intuitive viewer. The Hyperlinked Word Index on the transcript is fully functional and enables quick searches.

Hyperlinks >> As an additional service, your reporter can establish hyperlinks between exhibits and each introduction point in the transcript. These links will be activated if the Publisher Bundle is imported into RealLegal Binder™.

Easy RealLegal Binder import >> The entire contents can be loaded into an existing RealLegal Binder project, or into a

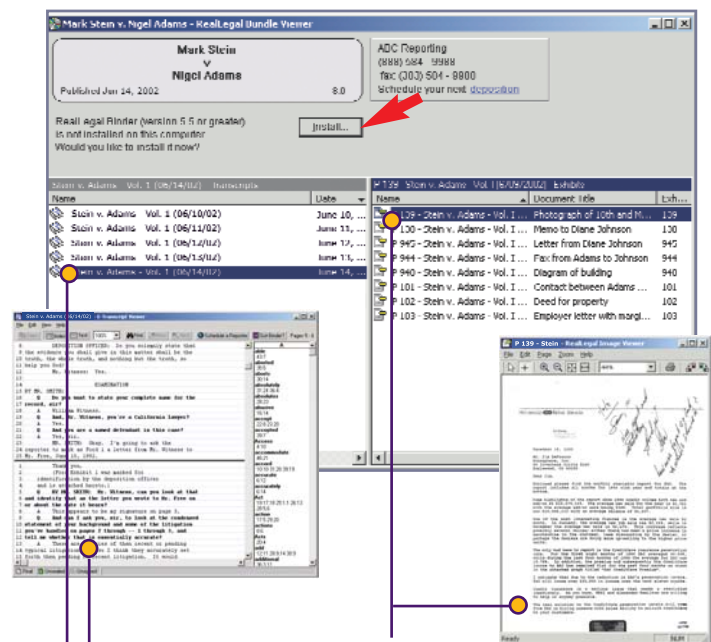

demo version of the software (see **arrow**). Once imported into RealLegal Binder, you can activate hyperlinks between exhibits and any relevant testimony, and utilize complete annotating, digesting, searching and reporting tools.

Bundles grow as your case grows >> As your case progresses, and additional depositions are held, you can request updated Publisher Bundle CDs. Your first Publisher Bundle may contain two weeks worth of discovery, while the third Publisher Bundle may contain three months worth of transcripts and exhibits. The bundle provides compact storage and easy browsing of all case materials.

Internet delivery >> Your court reporter can use a private and secure RealLegal iBinder™ repository to provide immediate delivery of all E-Transcript files and digital exhibits within a Publisher Bundle. The discovery can then be easily shared with co-counsel or imported into RealLegal Binder.
